

Find your next improvement

Use these 20 checks to review how your business shows up online. Mark each as done, needs work or not sure. Start on your phone and focus on the channels you actually use.

01 / Your website

- ☐ The first screen clearly explains what we offer and who it is for.
- ☐ Our text, navigation and buttons are comfortable to use on a phone.
- ☐ Our services explain what customers receive and how to take the next step.
- ☐ Our contact details, opening hours and service areas are current.

02 / Search and discovery

- ☐ Searching our business name leads to the correct website and profiles.
- ☐ Our key pages have clear, relevant titles and descriptions.
- ☐ Our business details are consistent across the profiles we maintain.
- ☐ We have checked for missing pages or indexing issues in our search tools, where available.

A check marked not sure is a question to investigate, not a failure. This checklist is a starting point, not a technical audit or a promise of rankings or sales.

Connect the customer journey

03 / Social presence

- ☐ Our bio explains what we do and links to a useful next step.
- ☐ Our pinned or featured posts introduce the business and current offer.
- ☐ Our recent posts answer real customer questions, not only promote offers.
- ☐ Someone is responsible for checking relevant messages and enquiries.

04 / Content and credibility

- ☐ We explain our services in words a new customer can understand.
- ☐ Our examples and customer feedback are genuine and used with permission.
- ☐ Important customer questions have clear answers on our site or profiles.
- ☐ Our photography and wording reflect what we currently deliver.

05 / Conversion and follow-up

- ☐ Our main button describes the action that happens after clicking.
- ☐ A test enquiry reaches the right inbox and shows a clear confirmation.
- ☐ Our team knows who replies and what response time we communicate.
- ☐ We can identify which enquiries become useful conversations without collecting unnecessary information.

Choose three things to improve

Start with anything that prevents an enquiry: broken links, unreadable pages or missed messages. Next clarify the offer and customer questions. Leave smaller cosmetic changes until the essentials work.

Priority 1

What needs attention

First action

Owner and review date

Priority 2

What needs attention

First action

Owner and review date

Priority 3

What needs attention

First action

Owner and review date

After making a change, repeat the original customer journey. Record what improved and what still needs work. Avoid changing everything at once: make the next step manageable.

Want help deciding where to start? Send your website link and the area you want to improve through jovamedia.com/contact.
